# ONBRANDING

Each product has a suggested branding method icon, these are suggestions of the best branding method to use for your products

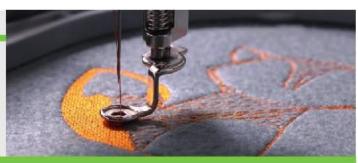

# **SCREEN PRINTING**

Screen printing is a printing technique whereby a mesh screen is used to transfer ink onto a substrate. This is the most common method of imprinting on promotional items and apparel.

#### **EMBROIDERY**

Embroidery is stitched with a computerised embroidery machine using patterns digitised with embroidery software. Artwork must first be digitised, which is the specialised process of converting two-dimensional artwork into stitches.

# **HEAT PRESS**

Heat press is imprinting a design or graphic onto a substrate, with the application of heat and pressure for a pre-set period of time.

# DYE SUBLIMATION

Dye Sublimation is digitally printed on a coated paper and then transferred to the substrate.
